Governors under siege	Although on paper central banks are more independent than ever, in practice governors may need to have more job protection to make this independence work.	1
Interview: Ernst Welteke	Ernst Welteke talks with the editor about the forthcoming restructuring of the Bundesbank, the euro, the ECB and the need for greater political integration in Europe.	4
The politics of the euro	André Szász, former executive director of the Nederlandsche Bank, opens up the debate about the need for political integration in Europe if the euro is to succeed.	12
Interview: Hanna Gronkiewicz-Waltz	The president of Poland's central bank describes how the far-reaching changes to the monetary policy framework are bedding down, and what is the role of the central bank in preparing for entry into Emu.	18
Foreign exchange intervention	In an exclusive survey of the mechanics of foreign exchange intervention, Chris Neely of the St Louis Fed lifts the lid on this usually highly secretive subject.	24
Reform of the IMF	From his first-hand experience in Indonesia, Steve Hanke gives his thoughts on what is wrong with the IMF and why it cannot be reformed.	38
The calculus of dollarisation	In a continuation of our series on dollarisation, Zeljko Bogetic compares the costs and benefits for the dollarising country and the "anchor" country.	45
Caribbean currency union	Despite much rhetoric from politicians, prospects for a single currency in the Caribbean are further away than ever, argues Delroy Alexander, a financial journalist based in Jamaica.	58

Interview: David Klein	With the Middle East teetering on the brink of armed conflict, we interview the newly appointed governor of the Bank of Israel, Dr David Klein.	65
Policy coordination in Colombia	Sergio Clavijo, member of the board of the Central Bank of Colombia, responds to Harvard Professor Alberto Alesina's proposals for reforming the institutional structure of the central bank.	71
Central bank independence	Economists should not give up trying to measure central bank independence just because it is difficult: the stakes are too high, argue John Maloney and Andrew Pickering.	86
Eastern Caribbean Central Bank	Governor K Dwight Venner describes how the role of a central bank has changed because of the "information revolution" and increasing demands for accountability and openness.	90
Trends in central bank transparency	A comparison of transparency levels in Western central banks and transition economy central banks has surprising implications for policymakers, says Mindaugas Vinkus.	94
Bringing central banking to the people	The Bundesbank's new central banking museum provides a unique channel for raising economic literacy and public support for central bank independence, argues Benedict Weller.	100
Trichet and the euro	Jean-Claude Trichet, ECB president-in-waiting, admits that the euro is threatened by a lack of macro policy coordination. Stephen Frowen reports.	105
